

The Pythia, The Sibyl, and the Seers of Antiquity

# HALF-DAY COURSES

SEMINAR with MICHAEL IRELAND, Ph.D.

## Seers, Sages, and Sibyls

A six-part series on the history of mediumship, magic, and mysticism

Why are we here? What is the meaning of life?

These questions have haunted humanity since the beginning of time. Through the ages, great philosophers have sought to understand and explain the mystery of life and existence. *Seers, Sages, and Sibyls* explores this world of mystical thought by telling stories from ancient civilizations. How can we truly understand the present until we know about the past?

What did the ancients believe about the nether world? About death and the afterlife? About communing with the dead? What were their truths? What theories endure - from culture to culture - from then to now? Is the Pythia the ancestor of the modern psychic? Is the Sibyl the forbearer of the current-day medium? Find out in this interesting and informative seminar.

In this series of half-day seminars, your host leads you on exotic historical journeys and introduces you to some of the most influential spiritual characters the world has ever known. In the first class, we'll do an overview of the trajectory of mystical knowledge throughout history and in subsequent classes we'll focus on key figures from our mystical past. Theories and ideas from history will be interwoven with the fabric of the present. Your host will provide modern-day perspectives and show us how our present spiritual awakening is inexorably linked to the wisdom from centuries long past. The seminar will relate directly to the questions and lives of psychics, mediums, healers and lightworkers today.

*Seers, Sages, and Sibyls* is entertaining, thought-provoking and right on target for any spiritual seeker who wants to understand where we came from, our purpose in the universe, and where we are going. Join Michael for life's greatest quest - the quest for meaning - as together we travel into the past - so we can understand our present.
